GUIDING PRINCIPLES FOR THE GOLDEN NECKLACE PROJECT

www.arroyoseco.org/goldennecklace

The purpose of the Golden Necklace Project is to support the development of multi-use trails that connect communities within the watershed of the Los Angeles and San Gabriel Rivers and their tributaries to each other and the natural environment.

DRAFT **Golden Principles**:

1. Support established organizations working to revitalize the rivers and improve access to them.
2. Connect existing trails to each other by creating new ones, especially through communities that lack recreation and open space.
3. Reduce reliance on automobile use by creating more opportunities for walking, biking, and horse back riding.
4. Encourage the physical, spiritual, educational, and social connections between the river and communities.
5. Foster sustainability in natural, social, and economic systems.
